

# SO FRESH, SO CLEAN,

## AND SO GREEN.

Whether your roof needs to be refreshed, restored or maintained, Polyglass' premium line of white coatings provides long-lasting, high-performance protection for any roofing system. Polybrite™ is a white, water-based coating that forms a seamless rubber membrane and is specifically designed to provide enhanced waterproofing protection, improve energy efficiency and deflect damaging heat and solar UV rays while helping to maintain cool building temperatures. Because of their energy efficient characteristics, Polybrite™ products comply with Cool Roof Rating Council (CRRC) ratings for solar reflectance and thermal emittance and are Miami-Dade County-approved. Polyglass coatings are so fresh, so clean and so green.

**Polybrite™ now FM 4470 Class 1 Approved!**
